

# CLEANING WITH GPN2

## GUIDELINES FOR USE

### **HOW IT WORKS:**

GPN2 is a natural cleaning product predominantly containing natural enzymes. The enzymes act as a catalyst and work to break down the sticky bonds of organic matter more effectively. Using GPN2 for 2 months will breakdown all the organic waste and remove the dirt. After this initial period we recommend introducing GPN3 to your cleaning regime to maintain the high standard achieved by GPN2.

### **WHY CHANGE TO GPN3**

GPN3 is a predominantly microbe based cleaning product that has specially selected strains of naturally occurring microbes that take organic matter and effectively 'eat' the dirt and convert it into water and odourless CO<sup>2</sup>. The process starts when the microbes find a suitable food source and then they create enzymes, which start to breakdown the organic waste into digestible portions. The microbes then digest the organics and re-spore starting the whole process again until all the food sources have been removed at which stage they go dormant, or until they have spored so many times that they can no longer spore and replicate. In effect giving you a natural cleaner that continues to work 24 hours a day seven days a week. (See GPN3 guidelines for use)

### **GENERAL PREPARATION:**

**ENSURE THAT THE INTENDED TREATMENT AREA IS FREE FROM ANY CHEMICAL RESIDUES AS THESE COULD HAVE A DETRIMENTAL EFFECT ON THE FRIENDLY BACTERIA YOU WILL INTRODUCE WHEN USING THE GPN RANGE. IF IN DOUBT – RINSE THE AREA THOROUGHLY USING CLEAN WATER. GPN2 IS MADE OF NATURALLY OCCURRING FRIENDLY BACTERIA AND ENZYMES WHICH BREAKDOWN THE STICKY BONDS OF ORGANIC WASTE AND START TO DIGEST THEM.**

**ENSURE ANY APPLICATORS, CLOTHS; MOPS; BUCKETS ETC ARE BRAND NEW AND CLEAN AND FREE FROM CHEMICALS AND ARE ONLY USED FOR GPN2.**

**IF THERE IS ANY HEAVY SOILING IN THE AREA OR ORGANIC WASTE THAT CAN BE MOPPED UP – DO THIS BEFORE STARTING THE TREATMENT.**

**SHAKE THE BOTTLE WELL TO ENSURE THE BACTERIA ARE DISPERSED THROUGHOUT THE FLUID.**

**DILUTE WITH LUKEWARM WATER, NOT HOT WATER AS THIS WILL KILL THE FRIENDLY BACTERIA AND ENZYMES.**

### **DILUTION:**

**SHOCK DOSE – TO ESTABLISH COLONY OF FRIENDLY BACTERIA**

**DAILY INITIAL CLEAN – FIRST 5 -7 DAYS – 4 PARTS CLEAN WATER TO 1 PART GPN2**

**MAINTENANCE DOSE – TO MAINTAIN AND TOP UP COLONY OF FRIENDLY BACTERIA**

**WEEKLY CLEANING – 10 PARTS WATER TO 1 PART GPN2**

**DAILY CLEANING – 10 PARTS WATER TO 1 PART GPN2**

#### **APPLICATION:**

**HARD SURFACE AREAS MAY BE TREATED USING TRADITIONAL CLEANING METHODS (MOPS, CLOTHS) HOWEVER; WE DO RECOMMEND THE USE OF A SPRAY APPLICATOR AND MICRO-FIBRE CLOTHS AROUND SINKS, TOILETS, ETC AND MOPS FOR FLOOR SURFACES. LEAVE AREA TO DRY NATURALLY AND GPN2 IS SAFE TO POUR DOWN DRAINS, IN FACT WE ENCOURAGE THIS, AS IT WILL CLEAN OUT DRAINAGE PIPES AND ALSO THE PIPES ON URINALS.**

**FOR URINALS WE RECOMMEND POURING A SMALL AMOUNT OF DILUTED PRODUCT DOWN EACH URINAL AFTER CLEANING. IN FACT RATHER THAN POUR ANY LEFT OVER PRODUCT DOWN THE OUTSIDE DRAIN, YOU CAN POUR IT DOWN THE URINALS AS THIS WILL THEN WORK ON ANY PIPE BLOCKAGES AND CLEAN THE PIPES.**

**PIPE BLOCKAGES CAN ALSO BE CLEARED USING UN-DILUTED GPN2 POUR @ 500ML OF GPN2 DOWN THE URINAL/DRAIN, THEN ADD 1 LITRE OF WARM WATER TO DISTRIBUTE GPN2 THROUGH THE DRAIN AND LEAVE FOR OVERNIGHT AND REPEATING AS NECESSARY FOR SEVERE BLOCKAGES.**

#### **APPLICATION – SHOCK DOSE:**

**A SHOCK DOSE MUST BE APPLIED THROUGHOUT THE INITIAL 5-7 DAY TREATMENT PERIOD.**

**DILUTE GPN AS RECOMMENDED IN THE TABLE ABOVE AND APPLY DAILY – THIS ALLOWS THE FRIENDLY BACTERIA TO BECOME ESTABLISHED IN THE AREA.**

**TAKE CARE TO ENSURE THAT ALL THE AREA IS TREATED – PARTICULARLY JOINS IN CARPETS, CRACKS IN TILES, DAMAGED GROUTING, SKIRTING BOARDS, BEHIND RADIATORS, ETC AS THESE AREAS ARE USUALLY DIFFICULT TO CLEAN.**

**LEAVE THE AREA AS DAMP AS PRACTICAL AND DO NOT USE ANY EXTRACTION EQUIPMENT.**

**GREEN PLANET CLEANING SOLUTIONS WILL BEGIN TO WORK IMMEDIATELY BUT YOU WILL NOTICE POSITIVE RESULTS WITHIN 7-10 DAYS IF NOT SOONER.**

**FOR PARTICULARLY DIRTY WASHROOMS YOU MAY NEED TO EXTEND THE SHOCK DOSE PERIOD**

#### **APPLICATION – MAINTENANCE DOSE:**

**ONCE THE FRIENDLY BACTERIA HAS BEGUN TO BREAK DOWN THE ODOUR SOURCE AND DIGEST THE NITRATES, YOU THEN NEED TO ENSURE THEY STAY IN CONTROL – THIS IS ACHIEVED BY APPLYING THE MAINTENANCE DOSE.**

**FOR DIFFICULT STAINING SUCH AS URIC ACID STAINS ON THE FLOOR AROUND URINALS YOU MAY WISH TO USE THE SHOCK DOSE UNTIL THE STAIN HAS STARTED TO DISAPPEAR**

## 5 GOLDEN RULES

- **ALWAYS FOLLOW THE MANUFACTURERS GUIDELINES**
- **AVOID CONTACT OR CROSS CONTAMINATION WITH CHEMICAL CLEANING PRODUCTS!**
- **NEVER MIX WITH ANY OTHER PRODUCTS UNLESS RECOMMENDED BY GREEN PLANET SOLUTIONS**
- **ALTHOUGH GREEN PLANET SOLUTION'S PRODUCTS ARE NON-HAZARDOUS, ALWAYS STORE SAFELY IN A COOL DRY AREA**
- **ALWAYS USE CLEAN LUKEWARM WATER IF AVAILABLE, HOT WATER WILL KILL THE FRIENDLY BACTERIA, IF IN DOUBT USE COLD WATER**
- **SHAKE BOTTLE WELL BEFORE USE**
