

CLEANING WITH GPN3

GUIDELINES FOR USE

How it works:

Gpn3 is a predominantly microbe based cleaning product that has specially selected strains of naturally occurring microbes that take organic matter and effectively 'eat' the dirt and convert it into water and odourless CO². The process starts when the microbes find a suitable food source and then they create enzymes, which start to breakdown the organic waste into digestible portions. The microbes then digest the organics and re-spore starting the whole process again until all the food sources have been removed at which stage they go dormant, or until they have spored so many times that they can no longer spore and replicate. In effect giving you a natural cleaner that continues to work 24 hours a day seven days a week.

GENERAL PREPARATION:

GPN3 USES NATURALLY OCCURRING FRIENDLY BACTERIA TO CLEAN AND ABSORB ORGANIC DIRT TURNING IT INTO WATER AND CO², AND IS THEREFORE SUSCEPTIBLE TO CHEMICALS, WHICH WILL KILL THE BACTERIA. CARE MUST BE TAKEN TO AVOID CROSS CONTAMINATION WITH CHEMICAL PRODUCTS

IF YOU INTEND TO USE GPN3 AS A SHAMPOO IN A CARPET-CLEANING MACHINE – ENSURE THAT ALL MACHINERY IS RINSED WITH CLEAN WATER TO REMOVE ANY EXISTING CHEMICAL RESIDUES.

ENSURE ANY APPLICATORS, CLOTHS; MOPS; BUCKETS ETC ARE BRAND NEW AND CLEAN AND FREE FROM CHEMICALS AND ARE ONLY USED FOR GPN3.

IF THERE IS ANY HEAVY SOILING IN THE AREA OR ORGANIC WASTE THAT CAN BE MOPPED/VACUUMED UP – DO THIS BEFORE STARTING THE TREATMENT.

SHAKE THE BOTTLE WELL TO ENSURE THE BACTERIA ARE DISPERSED THROUGHOUT THE FLUID.

DILUTE WITH LUKEWARM WATER.

DILUTION: DEPENDANT OF FREQUENCY OF CLEANING

SHOCK DOSE – TO ESTABLISH COLONY OF FRIENDLY BACTERIA

DAILY INITIAL CLEAN – FIRST 5-7 DAYS – 4 PARTS CLEAN WATER TO 1 PART GPN3

MAINTENANCE DOSE – TO MAINTAIN AND TOP UP COLONY OF FRIENDLY BACTERIA

MONTHLY CLEANING – 10 PARTS WATER TO 1 PART GPN3

WEEKLY/DAILY CLEANING – 20 TO MAXIMUM OF 40 PARTS WATER TO 1 PART GPN3

APPLICATION:

WHEN USING GREEN PLANET CLEANING SOLUTIONS ON CARPETS OR SOFT FURNISHINGS, WE ADVISE THAT THE PRODUCT BE APPLIED USING EITHER A PRESSURE SPRAY SET ON A COARSE JET SETTING TO AVOID ATOMISING THE PRODUCT - DO NOT INHALE, (REFER TO MSDA SHEET) OR A TRIGGER SPRAY – THIS

WEBSITE: WWW.GREENPLANETSOLUTIONS.CO.UK

'OUR PLANET – OUR RESPONSIBILITY'

ENSURES THAT THE MICROBES ARE DISTRIBUTED EVENLY AND ARE ABLE TO COVER TO ANY HARD TO REACH AREAS.

HARD SURFACE AREAS MAY BE TREATED USING TRADITIONAL CLEANING METHODS (MOPS, CLOTHS) HOWEVER; WE DO RECOMMEND THE USE OF A SPRAY APPLICATOR AND MICRO-FIBRE CLOTHS

APPLICATION – SHOCK DOSE:

A SHOCK DOSE MUST BE APPLIED THROUGHOUT THE INITIAL 5-DAY TREATMENT PERIOD.

DILUTE GPN AS RECOMMENDED IN THE TABLE ABOVE AND APPLY DAILY – THIS ALLOWS THE FRIENDLY BACTERIA TO BECOME ESTABLISHED IN THE AREA.

TAKE CARE TO ENSURE THAT ALL THE AREA IS TREATED – PARTICULARLY JOINS IN CARPETS, CRACKS IN TILES, DAMAGED GROUTING, SKIRTING BOARDS, BEHIND RADIATORS, ETC AS THESE AREAS ARE USUALLY DIFFICULT TO CLEAN.

LEAVE THE AREA AS DAMP AS PRACTICAL AND DO NOT USE ANY EXTRACTION EQUIPMENT.

GREEN PLANET CLEANING SOLUTIONS WILL BEGIN TO WORK IMMEDIATELY BUT YOU WILL NOTICE POSITIVE RESULTS WITHIN 10-14 DAYS IF NOT SOONER.

APPLICATION – MAINTENANCE DOSE:

ONCE THE FRIENDLY BACTERIA HAS BEGUN TO BREAK DOWN THE ODOUR SOURCE AND DIGEST THE NITRATES, YOU THEN NEED TO ENSURE THEY STAY IN CONTROL – THIS IS ACHIEVED BY APPLYING THE MAINTENANCE DOSE.

SUGGESTED DILUTION RATES ARE AN INDICATION ONLY AND YOU MAY FIND THAT YOU CAN USE HIGHER DILUTION RATES ONCE THE AREA HAS ESTABLISHED A BASE OR COLONY OF FRIENDLY BACTERIA. THE BACTERIA WORKS 24 HOURS A DAY, 7 DAYS A WEEK, 365 DAYS A YEAR, THEREFORE IT IS ALSO POSSIBLE THAT YOU CAN REDUCE THE FREQUENCY OF CLEANING.

IF YOU FIND THAT THE AREA IS REMAINING CLEAN THEN YOU MAY WISH TO USE HIGHER DILUTION RATES IN SCRUBBER DRYERS AS THE MAINTENANCE DOSE, BUT THIS IS ONLY RELEVANT FOR DAILY CLEANING AND YOU SHOULD MONITOR THE RESULTS OF THE CLEANING AND RE-ADDRESS THE DILUTION RATES IF THE CLEANING STANDARD DETERIORATES.

FLOOR CLEANING MACHINES

OVER TIME YOU WILL NOTICE THAT THE MACHINES WILL BE EASIER TO MAINTAIN AND THE PROBLEMS WITH SMELLS FROM THE WASTEWATER RESERVOIR WILL DISAPPEAR, THIS IS DUE TO THE BACTERIA CLEANING THE MACHINE AND THE WASTEWATER TANK.

'OUR PLANET – OUR RESPONSIBILITY'

5 GOLDEN RULES

- **ALWAYS FOLLOW THE MANUFACTURERS' GUIDELINES.**
- **AVOID CONTACT OR CROSS CONTAMINATION WITH CHEMICAL CLEANING PRODUCTS!**
- **NEVER MIX WITH ANY OTHER PRODUCTS UNLESS RECOMMENDED BY GREEN PLANET SOLUTIONS.**
- **ALTHOUGH GREEN PLANET SOLUTION'S PRODUCTS ARE NON-HAZARDOUS, ALWAYS STORE SAFELY IN A COOL DRY PLACE.**
- **ALWAYS USE CLEAN LUKEWARM WATER IF AVAILABLE, NOT HOT WATER AS THIS WILL KILL THE FRIENDLY BACTERIA! IF IN DOUBT USE COLD WATER.**
- **SHAKE BOTTLE WELL BEFORE USE.**
