## Aero Flow Showerhead

Unique air intake uses less water than traditional showers and saves money.

- Unique air intake uses substantially less water than traditional showers
- Water saving and energy efficient
- Mixes air with water, giving an average flow rate of 8.5 litres/min at 3 bar
- Save water. . . and money
- Precision engineered
- Adjustable shower profile
- Up to 60% saving on traditional high-flow rate showers
- ECA approved
